

Proposed LCC Regions

This table depicts the 31 circuits of LCC grouped in eight contiguous regions, ranging in size from 1 to 5 circuits and from 17 to 46 congregations with total communicant membership ranging from 1,641 to 9,079 (2014 Data). Provincial borders, density and size are the primary factors in determining the number and shape of proposed regions. The first number following the name of the Region is the number of congregations in that Region and the second number is the total communicant populations of that Region.
